

# Linear Abraser 5750

**TABER**<sup>®</sup>  
INDUSTRIES  
ISO 9001:2000 CERTIFIED

## Contoured Surface Testing

### Measure abrasion resistance and other material properties of finished products of any size or shape – flat, concave or convex.

The Linear Abraser uses a free-floating head to follow the contours of every sample, permitting testing of finished products. With virtually no limit on sample size or shape, the Linear Abraser is ideal for testing consumer products, automotive components, painted parts, printed graphics, optical products, rubber, leather, textiles, and for use in testing laboratories.

### Versatile testing with a single, rugged, durable machine.

With adjustable stroke length, speed, load, and a wide selection of Taber attachments, the Linear Abraser allows you to customize test parameters to your exact needs. Optional attachments can be used to perform scratch, coin scrape, Crockmeter, rub, pencil hardness scratch, paperclip mar, magnetic stripe abrasion, wire insulation scrape, chemical rub, plus custom testing.

### Maintain consistent testing standards with Taber's world-famous abrasives.

The Linear Abraser abrades with a Wearaser<sup>®</sup>. The size and shape of a pencil eraser, the Wearaser uses the same high-quality Taber abrasive media found in our world-famous wheels so you're assured of consistent test results.
